The 22 Oz. (0.6 L) Sport Berkey® Bottle uses the same filtration medium as our Black Berkey® Purification Elements, which are used in our freestanding, gravity-fed systems. The filter element reduces microorganisms by greater than 99.9%, and viruses by greater than 97%. It also removes or dramatically reduces heavy metals, herbicides, pesticides, pharmaceuticals, organic chemicals, petroleum-based products, unpleasant tastes and odors, silt and sediment.

Precautions

- To prevent leaks, do not store filled bottle on its side or upside down.
- Do not allow filter to freeze.
- Do not place bottle or filter in dishwasher or microwave oven.
- Do not run hot water through filter.

Specifications

- Capacity: 22 oz. (0.6 L)
- 50 year shelf life
- Each filter provides about 160 refills when using raw or untreated water, about 640 refills using everyday drinking water.

Warranty Information

The Sport Berkey® Bottle is covered by the NMCL Limited Warranty: 6 Months. Warranty coverage begins the date product is received.

For the most up to date list of warranty exclusions, please visit:

USAGE & STORAGE

IMPORTANT! Flush Filter Before Use

Flushing clears excess carbon from the manufacturing process.

1. Pull lid closure down so that straw is exposed.
2. With bottle full of water, squeeze the bottle for 3-4 seconds to flush water through filter and straw.
3. **Repeat until water runs clear.**
4. Bottle is ready to use.

Using Your Bottle

1. Fill the Sport Berkey® Bottle with water.
2. Screw on lid and tighten securely to prevent leaks.
3. To drink, pull lid closure down to expose straw.
4. To close, simply pull lid closure up to conceal straw (this helps prevent drips or leaks while carrying).

Replacing the Filter

Each Sport Berkey® filter provides about 160 refills when using raw or untreated water, or about 640 refills using everyday drinking water.

1. Unscrew lid from bottle.
2. Pull existing filter from straw.
3. Push new filter onto straw.
4. Flush new filter before using (see above for instructions).

Cleaning and Storage

Periodically remove straw filter element and clean the bottle and straw with warm water and mild, unscented dish soap.

If straw filter element will not be used for an extended period of time:

1. Remove filter from straw and allow to air dry.
2. Once filter is dry, place it back on straw inside bottle.
